NAZE MAP
1998
LAND AT THREAT
FROM THE SEA

WALTON-
ON-THE-NAZE

OPTION ONE - DO NOTHING - **EASY OPTION**

1. Erosion will continue -
2. Policy challenges -
3. Permissions challenges - cost, time
4. Devolution - who will be our partners?
5. Resource challenges -
6. Technical challenges-
7. Consultation challenges

BACK TO REALITY

1. Already a strong partnership
2. Accept erosion will continue
3. Understand what we can do
4. Understand what everyone wants
5. Mutual benefit is a win/win

CONCEPT OF **NAZE** CLIFFLINE

1. Define solutions - Naze Tower/Anglian Water
2. Understand change and impact on Hamford Water
3. Evaluate what we have - what change means
4. Accept climate change is coming - but gradually
5. Use evaluation as evidence finding -
6. Evidence will allow investment to **SLOW** erosion -
2025-2050

EVALUATION - WHAT DOES IT MEAN?

1. The value of the environment/the economy of **Hamford Water** and the **Naze** together that benefits the local and wider community
2. Involve the whole community in process
3. Use evaluation to create clear evidence of need to justify **slowing erosion** 2025-2050

WHAT DOES **EVALUATION** CREATE?

1. Evidence for support from permission givers
2. Evidence of support from the community
3. Evidence of need for funders to invest in **Naze** cliffline installations

NAZE PROTECTION SOCIETY 2025

1. **Naze Protection Society** is a partnership - community; agencies; local government
2. Evaluation project is the key to the future
3. Fundraising will continue
4. Maintenance works on 2016 gabions & 2022 works

Naze Protection Society, the future and **YOU**

1. **Naze** cliffline project - delivering solutions 2025-2050
2. Naze **Protection** Society - it is your society - its future is defined by local support
3. Change on the Naze will happen the choice is investment or crisis management
4. The future of the Naze rests on our choice
